DESIGN RULES

Dominance	Pink highlights ONE element per slide. Navy leads; grey supports. Never give all cards equal weight.
Whitespace	Minimum 0.5″ margins. Breathing room beats filling every inch.
No AI slop	No accent lines under every title. No full-width colour bars. No cream backgrounds.
Visual always	Every slide needs a graphic — Venn, diamond, icon row, image, chart, or stat callout. No text-only.
Left-align	Paragraphs and bullets are left-aligned. Only titles may centre.

LAYOUT PATTERNS

Reach for these, not blank slides.

Ten reusable layouts in the master template (.pptx). Use one per slide.

01 **Cover / title**
Day opener. Navy bg, pink accent bar, bold white title.

02 **Section divider**
Session intros + case study intros. Eyebrow → bar → big title.

03 **Content + image**
Most teaching slides. Bullets left, image placeholder right.

04 **Before / after compare**
Two columns. 'After' side gets the pink-pale fill (it's the hero).

05 **Venn diagram (2 circles)**
Overlap concepts — Branding × Perception, UVP × audience, etc.

06 **4-card feature grid**
'Why branding matters' pattern. ONE card pink, rest grey.

07 **Pull quote / big stat**
Dark navy bg. Oversized pink quote mark. Eyebrow source below.

08 **Case study**
Thin navy top strip, 3 date-stat rows left, image + tagline box right.

09 **Exercise card**
Solid pink left column with exercise number. Numbered steps right.

10 **3-step process flow**
Numbered circles connected by grey line. ONE circle pink.

IMAGES

Use real Gambian photography wherever possible.

- Prefer warm natural light. People at work or in context, not staged. 16:9 or 4:3 crops.
- Every image placeholder is labelled with a content brief — swap, don't leave grey boxes in final decks.
- Credit the source in a 9pt muted caption when using third-party images (e.g. Kara Tunga, SEYBIO).
