ChatGPT

Branding and Communication Specialist Kick-off Deck for Blue Tourism Across Six SWIO Territories

Executive summary

This report provides a **ready-to-use slide deck outline and timed speaking notes** for a **5-minute internal coordination update** as the Branding & Communication Specialist supporting a multi-territory "blue tourism" effort across **Mauritius, Seychelles, Réunion, Mayotte, Comoros, and Madagascar**. The structure and messaging are designed to align with (a) the project's internal coordination needs (stakeholder mapping, institutional landscape, engagement dynamics, success stories), and (b) the regional implementation reality: **a private-sector platform with regional reach and explicit priorities on sustainable tourism and the blue economy**. [1]

Two evidence-backed implications for your role drive the deck:

- **Regional coherence matters.** Cap Business Océan Indien [2] 's roadmap explicitly identifies "Ocean/Blue Economy" and "Sustainable tourism" as priority sectors, which supports positioning communications as a **regional enablement function**, not six disconnected campaigns. [3]
- **Public–private dialogue is not optional.** The Indian Ocean Commission [4] strategic development plan explicitly calls for facilitating **public–private dialogue at a regional level**—a strong mandate for communications to be governance-aligned and stakeholder-owned. [5]

Finally, "blue tourism" is treated here as a governance-and-credibility topic (not just promotion): the Blue Tourism Initiative [6] frames blue tourism as improving coastal/marine tourism governance toward **sustainable, inclusive, resilient** development and addressing environmental, socio-cultural, and economic challenges. [7]

Slide deck architecture

Core deck for the five-minute slot

The outline below is optimized for **9–10 slides in five minutes** (≈25–35 seconds per slide). It ends with clear "asks," while leaving detailed territory content to backup slides.

Slide	Title	Purpose	Talking points (1–3 bullets)
1	Role and objective	Reintroduce your function as an implementation enabler	• Branding/comms = adoption engine: clarity, coherence, credibility. • Align project narrative across territories and stakeholders.

Slide	Title	Purpose	Talking points (1–3 bullets)
2	What “blue tourism” means for communications	Define the term in operational comms language	• Blue tourism = coastal/marine tourism governed for sustainable, inclusive, resilient outcomes. [7] • Communications must translate governance into understandable value.
3	Regional context we can leverage	Anchor legitimacy in regional institutional reality	• Cap Business roadmap: “Ocean/Blue Economy” + “Sustainable tourism” as priority sectors. [8] • IOC calls for strengthened public–private dialogue and synergies. [5]
4	Stakeholder tiers and comms channels	Show how you will map and activate stakeholders	• Legitimizers (policy/parks), Mobilizers (industry/chambers), Amplifiers (DMOs/ media/creators). • Use tiered channels to avoid fragmentation and increase ownership.
5	Communications governance and “evidence gating”	Reduce risk of fragmented or over-claiming messages	• Optional rule set: claim → proof → approval pathway. • Use “proof-points” per territory to prevent perceived bluewashing. (Framed by Blue Tourism Initiative’s governance emphasis.) [9]
6	Success-story pipeline	Explain how early wins become shared assets	• Build a system to capture: story + metric + partner quote + visual. • Prioritize stories that strengthen ownership and replication across territories.
7	External benchmarks	Demonstrate credible, transferable models	• Destination pledges, “give-back” programs, and standards reduce reputational risk and shift behaviors (see reference cases section). [10]
8	Territory worksheet	Show the reusable framework you will run with local reps	• Five boxes: brand start / anchors / mobilizers / sensitivities / proof-point. • Enables comparable inputs across six contexts.
9	What I need from you	Convert the meeting into inputs that unlock work	• One mobilizer list per territory. • Two “non-negotiables” per territory for careful messaging. • One quick proof-point per territory.
10	Asks and immediate next steps	Close with exact asks + timing	• Agree on comms governance. • Confirm local focal points. • Validate initial proof-points and risks.

Backup slides (one per territory)

Use these as **appendix slides** if the room asks for more detail, or as inputs into internal synthesis. Each is structured using the 5-box worksheet template in the next section.

Reusable five-box territory worksheet

Paste the following once per territory (keep each box to 1–2 lines in the first iteration):

Brand starting point

- Current tourism identity and dominant imagery (what visitors already "know" or expect).

Institutional anchors

- Tourism authority / ministry + blue economy / environment bodies + marine protected area governance where relevant.

Key mobilizers

- Chambers, industry confederations/associations, tourism clusters, large operator groups, training networks.

Engagement sensitivities

- Trust dynamics, constraints, contested resources, "initiative fatigue," safety perceptions, language/cultural cues.

Blue tourism proof-point

- One credible, specific asset/story (policy instrument, protected area, levy, program, governance mechanism) that can be communicated without over-claiming.

Pre-filled starter content for the six SWIO territories

These starters are intentionally **concise and evidence-anchored** to the most defensible "first pass" sources. Where a stakeholder group is likely but not yet confirmed, it is marked "verify locally."

Mauritius starter

Brand starting point

- Immediate association: resort/lagoon/coastal leisure; opportunity to reposition toward "sustainability, inclusiveness, resilience" as an explicit tourism direction. [11]

Institutional anchors

- Tourism: the annual report references a **10-year tourism plan/blueprint** commissioned mid-2023 with the World Bank [12] and assistance from UN Tourism [13], explicitly prioritizing sustainability, inclusiveness, and resilience. [11]

Key mobilizers

- Core mobilizers to verify locally: tourism operator networks + the local chamber (as part of Cap Business's chamber federation model). [14]

Engagement sensitivities

- High expectations: "sustainable tourism" messaging will likely be scrutinized because it is embedded in national planning language (risk of "aspirational branding" if proof is thin). [11]

Blue tourism proof-point

- "A nationally-backed shift toward a long-horizon tourism blueprint with sustainability/resilience priorities" (communicate as direction + process, not as achieved outcomes yet). [15]

Suggested visual

- A simple "Tourism Blueprint → Sustainability/Resilience" flow graphic over a Mauritius coastline image (or a blueprint/plan visual motif).

Seychelles starter

Brand starting point

- Strong premium/nature brand; easy to anchor "blue tourism" in visible policies that touch every visitor night.

Institutional anchors

- Tourism policy instrument: the Tourism Environmental Sustainability Levy update confirms changes effective **January 1, 2026**, shaping how accommodation providers collect and communicate sustainability contributions. [16]
- Strategy anchor: the Seychelles Sustainable Policy Framework (2024–2034) emphasizes governance and participation (use this to justify comms governance and stakeholder ownership). [17]

Key mobilizers

- Verify locally: accommodation providers and industry networks (they are directly involved in levy collection/visitor touchpoints). [18]

Engagement sensitivities

- If levy messaging is unclear, it can create friction with small operators and visitors; messaging must be precise (who pays, what changed, what it supports). [16]

Blue tourism proof-point

- "A national sustainability levy collected in-destination through accommodation providers (with 2026 amendments)"—a concrete, communicable governance mechanism. [19]

Suggested visual

- A simple "Visitor night → levy → conservation/community outcomes" diagram (no amounts unless officially confirmed for this meeting).

Réunion starter

Brand starting point

- "Intense island" adventure + nature; blue tourism can be framed via marine reserve stewardship and responsible lagoon experiences.

Institutional anchors

- The Natural Marine Reserve was created in **2007**, spans ~40 km of coastline, and shelters **3,500+ marine species** (strong anchor for legitimacy and education-oriented messaging). [20]
- The reserve governance body and identity page can support "rules + education + safety" messaging. [21]

Key mobilizers

- Verify locally: tourism promotion bodies, water-sports and diving operators, protected-area education programs (reserve-adjacent "message carriers"). [22]

Engagement sensitivities

- Marine reserve implies behavioral rules; messaging must prevent conflict between "access" narratives and "protection" narratives (especially for lagoon use). [23]

Blue tourism proof-point

- The Marine Reserve itself: a high-credibility, visitor-facing proof-point with concrete geography and biodiversity framing. [24]

Suggested visual

- Map snippet of the marine reserve coastline + "respect and protect biodiversity" iconography.

Mayotte starter

Brand starting point

- Strong “lagoon” identity; blue tourism brand can be anchored in the marine park’s scale and conservation–development mandate.

Institutional anchors

- Legal anchor: the marine park was created by decree **January 18, 2010**. [25]
- Program anchor: official descriptions emphasize ~**69,000 km²** covering lagoon, territorial waters, and EEZ, and a mandate to reconcile biodiversity protection with sustainable development of maritime activities. [26]

Key mobilizers

- Verify locally: marine tourism operators + park governance/education interfaces + local chamber (Cap Business network). [27]

Engagement sensitivities

- Protected areas can create perceived trade-offs; communications must emphasize “rules that enable long-term economic activity,” not only restrictions. The park frames the objective as balancing conservation with sustainable activity. [28]

Blue tourism proof-point

- The Parc naturel marin: a legally defined, high-visibility governance asset with strong “blue tourism” legitimacy. [29]

Suggested visual

- Park perimeter map (official map-style), with a single label: “Biodiversity + sustainable maritime activities.”

Comoros starter

Brand starting point

- Lower global visibility relative to neighbors; branding opportunity is “distinctiveness + governance readiness,” avoiding overpromising.

Institutional anchors

- Tourism strategy framing: “Tourism Vision 2030” is described with three strategic axes—**offer improvement, promotion, and sector governance**—useful for aligning communications with institutional priorities. [30]

- Programmatic context: a recent country strategy document references the Plan Comores Emergent and emphasizes mobilization across authorities, private sector, civil society, and partners (useful for stakeholder ownership framing). [31]

Key mobilizers

- Verify locally: tourism SMEs, community organizations in coastal corridors, and development-partner convening platforms (likely strong compared to purely private networks). [32]

Engagement sensitivities

- Coordination risk: one World Bank analysis notes misalignment across strategic documents and stresses the need for coordination (key argument for comms governance and shared narrative). [33]

Blue tourism proof-point

- "A national tourism vision structured around offer/promotion/governance," allowing you to position comms deliverables as directly enabling the governance and promotion axes. [30]

Suggested visual

- A triangle graphic with the three axes: Offer / Promotion / Governance.

Madagascar starter

Brand starting point

- Global association with exceptional nature; challenge is trust and "market readiness." Brand can shift toward "accessible, credible, digitally visible, sustainable experiences."

Institutional anchors

- Marketing direction: official terms of reference state the last tourism marketing strategy was updated in **2016** and calls for a **2025–2029** marketing strategy and destination positioning "primarily toward digital." [34]
- Private sector mobilizer: the tourism private sector has a validated **2023–2027** roadmap intended to guide sector action (useful for alignment and stakeholder ownership). [35]

Key mobilizers

- Core: tourism private sector confederation (national-level convening), plus campaign delivery partners for digital-first promotion. [36]

Engagement sensitivities

- Avoid "brand-first" messaging; position communications as "market access + quality + credibility," consistent with the push toward digital positioning and structured sector roadmapping. [37]

Blue tourism proof-point

- "A formal move toward digital-first destination positioning and a new marketing strategy cycle" (useful to justify shared asset systems, content pipelines, and measurement). [38]

Suggested visual

- A "digital funnel" visual: Story assets → channels → targeted markets → measurable engagement.

External blue tourism branding reference cases

The cases below are selected because they translate well to SWIO "blue tourism" realities: multi-stakeholder governance, marine ecosystem sensitivity, and credibility risk. The "transferable elements" are phrased as design patterns you can reuse.

Reference case	What it is	Transferable elements for SWIO	Core sources
Palau Pledge	A visitor pledge tied to entry experience (passport pledge)	• Make responsibility a "moment of entry" (arrival, booking, check-in). • Use a simple commitment to support behavior change and legitimacy.	[39]
Tiaki Promise (New Zealand)	A national responsible travel "guardian" pledge	• Use culturally grounded "guardian" framing. • Provide clear guiding principles that are easy to share and translate.	[40]
The Icelandic Pledge (Visit Iceland)	A public digital pledge focused on responsible behavior	• Use a lightweight, digital-first pledge that visitors can share. • Make "do/don't" behavior guidance concrete and memorable.	[41]
Mālama Hawai'i	"Give back" voluntourism experiences with partner incentives	• Convert sustainability into participatory experiences. • Build operator incentives (discounts/free night) tied to verified activities.	[42]
Loloma Hour (Fiji)	Invitation to spend an hour on a sustainability activity	• Create a simple, measurable behavioral ask ("give one hour"). • Offer menu of partner activities aligned to reefs/coasts/community.	[43]
Blue Flag	A global eco-label for beaches, marinas, and tourism boats	• Use standards as "proof" behind communications. • Translate criteria into visitor-friendly quality signals and operator guidance.	[44]

Reference case	What it is	Transferable elements for SWIO	Core sources
Green Fins	A program for dive/ snorkel operators to reduce reef impacts	• Focus on specific high-impact operator segments (dive/snorkel). • Offer guidelines and measurable reduction of negative impacts.	45
Slovenia Green Scheme	National umbrella program aligning destinations/providers under a “Green” brand	• Use a single umbrella brand with tiered labels (destinations, providers, parks). • Encourage consistent standards while allowing local identity.	46
Costa Rica CST	National sustainable tourism certification managed by the tourism institute	• Position certification as credibility infrastructure for claims. • Encourage business-level adoption, then market-level storytelling.	47
GSTC Destination Standard	Global baseline sustainability standard for destinations	• Use an internationally recognized standard to structure measurement and claims. • Build comms around the four-pillar logic (governance, socio-economic, cultural, environment).	48

Team asks and one-page speaker script

A slide of suggested asks with exact wording

Use this as “Slide 10: Asks” (or as the final slide if time compresses).

Ask about stakeholders (mobilizers and amplifiers)
Exact wording: *“For your territory, please send me by Friday a short list of your top five mobilizers and amplifiers —organizations that can convene tourism operators quickly and credibly carry messages (industry bodies, chambers, trusted NGOs, key media, flagship events).”* (Grounded in Cap Business’s chamber/professional federation model.) 14

Ask about institutional non-negotiables (to protect credibility)
Exact wording: *“Please share two non-negotiables for external messaging—claims we must not make without verification, sensitivities we must respect, and any terminology to avoid.”* (Aligned to “governance first” emphasis in blue tourism framing.) 9

Ask about proof-points (to enable early success-story content)
Exact wording: *“Please identify one concrete blue tourism proof-point we can safely talk about now—policy instrument, protected area, governance initiative, or partnership—plus who can approve its use publicly.”* (Protected areas / policy instruments are strong early anchors in Réunion/Mayotte/Seychelles examples.) 49

Ask about local focal points and review cycle
Exact wording: *"Can we confirm one local comms focal point per territory and a simple review cycle so that anything public is consistent, accurate, and fast?"* (Supports IOC's "synergies" and public–private dialogue logic.) [5]

Five-minute speaker script (timed, one-page)

00:00–00:25 — Slide 1 (Role and objective)
"Hi everyone—I'm the Branding and Communication Specialist on the project. My job is to make sure blue tourism is not only implemented, but understood, adopted, and communicated consistently across all six territories. I'm approaching communications as an implementation enabler: clarity for stakeholders, coherence across territories, and credibility in what we claim publicly."

00:25–00:55 — Slide 2 (What blue tourism means for comms)
"When I say 'blue tourism,' I'm using the governance lens: coastal and marine tourism shaped for sustainable, inclusive, and resilient outcomes. That framing matters because it means our communications must translate governance and real practices into simple messages and assets—otherwise we risk creating a brand story that stakeholders don't own." [7]

00:55–01:25 — Slide 3 (Regional context we can leverage)
"The good news is that the regional architecture supports this. Cap Business's roadmap explicitly links sustainable tourism and the blue economy as priority sectors, and the Indian Ocean Commission calls for public–private dialogue and regional synergies—so we have a mandate to build a shared narrative and shared tools, not isolated island campaigns." [50]

01:25–01:55 — Slide 4 (Stakeholder tiers and channels)
"To move fast without fragmentation, I'll map stakeholders by function: legitimizers—ministries, tourism authorities, marine protected areas; mobilizers—industry bodies and chambers; amplifiers—DMOs, media, creators. Each tier gets a tailored channel approach so that adoption is real and message drift is minimized."

01:55–02:30 — Slide 5 (Comms governance and evidence gating)
"Because 'blue tourism' is credibility-sensitive, I propose light governance: for any external message, we link the claim to a proof-point and confirm who signs off. That's not bureaucracy—it's what protects the project from bluewashing perceptions and keeps partners confident." [9]

02:30–03:05 — Slide 6 (Success-story pipeline)
"I'll set up a success-story pipeline so early wins become reusable assets: a short story, a metric or indicator, a partner quote, and a visual. That gives us consistent content for reports, stakeholder engagement, and eventual market-facing communications."

03:05–03:35 — Slide 7 (External benchmarks)
"We'll borrow what works internationally: pledges that set expectations—like Palau, New Zealand, Iceland—give-back programs like Hawai'i and Fiji, and standards like Blue Flag or Green Fins that turn claims into verifiable practice." [51]

03:35–04:05 — Slide 8 (Territory worksheet)
“To keep this comparable across all six territories, I’ll use a five-box worksheet: brand starting point, institutional anchors, key mobilizers, engagement sensitivities, and one proof-point we can communicate safely.”

04:05–04:40 — Slide 9 (What I need from you)
“I’ll need three inputs from each territory: your top five mobilizers and amplifiers, two messaging non-negotiables, and one proof-point plus who can approve it. That lets me build a first-pass regional narrative and country-specific message modules fast.”

04:40–05:00 — Slide 10 (Asks and next steps + transparency about prior collaboration)
“Last note: I haven’t previously collaborated with Cap Business or the local chambers. I see that as an advantage—I can structure communications neutrally and consistently from day one, while we confirm the right validation pathways with each local team. If we agree today on focal points and a simple review cycle, I can come back quickly with a draft narrative, the initial asset kit, and a success-story capture plan.”

Stakeholder tiers, comms channels, and next 60–90 day deliverables

Comparative stakeholder tier and comms channel matrix

This table is built from the most defensible institutional anchors available in primary sources; “mobilizers/amplifiers” are framed as confirmable channels unless the relevant source explicitly supports them.

Territory	Legitimizers (institutional anchors)	Mobilizers (conveners)	Amplifiers (channels)
Mauritius	National tourism planning anchored in a 10-year blueprint process supported by World Bank and UN Tourism. [11]	Verify locally: industry bodies + chamber network aligned with Cap Business’s federation model. [14]	Digital-first storytelling aligned to blueprint priorities (sustainability/resilience) and investor-oriented messaging. [52]
Seychelles	Tourism Environmental Sustainability Levy and updates effective Jan 1, 2026; plus sustainable policy framework governance orientation. [53]	Accommodation providers (levy collection touchpoint) and public–private governance mechanisms referenced in national frameworks. [54]	Visitor-facing levy communication at checkout + sustainability framework narratives; strong scope for pledge/give-back pilots. [55]
Réunion	Natural Marine Reserve created in 2007, biodiversity anchor; reserve governance identity. [56]	Verify locally: lagoon activity operators + conservation education interfaces. [22]	Reserve-based “responsible lagoon” guidance, education content, and experience-based storytelling. [57]

Territory	Legitimizers (institutional anchors)	Mobilizers (conveners)	Amplifiers (channels)
Mayotte	Marine park created by decree Jan 18, 2010; official description emphasizes scale and biodiversity + sustainable activities mandate. [58]	Verify locally: marine tourism operators + park convening + chamber network. [59]	Park map + “biodiversity and sustainable maritime activities” narratives for operator toolkits and visitor guidance. [60]
Comoros	Tourism Vision 2030 with offer/promotion/ governance axes; coordination needs highlighted in analysis. [61]	Verify locally: coastal community groups + development partner convening + private sector mobilization emphasized in country strategy framing. [31]	Governance-and-readiness messaging; simple “three-axes” framing to align stakeholders. [62]
Madagascar	Marketing TOR: strategy 2025–2029 and digital-first positioning; private sector roadmap 2023–2027. [37]	Tourism private sector confederation roadmapping as convening channel. [35]	Digital brand assets + content pipeline aligned to national repositioning goals. [38]

Next 60–90 days deliverables timeline

The timeline below assumes “Day 0” is **April 13, 2026** and is scoped to deliver high-leverage comms infrastructure rather than large-scale external campaigns.

```
timeline
    title Branding & Comms Deliverables (Apr–Jul 2026)
    Apr 2026 : Agree comms governance (claims-proof-approvals) ; Confirm focal points per territory ; Collect 5-box worksheets (v1)
    May 2026 : Draft regional narrative + glossary ("blue tourism" definitions) ; Territory message modules (v1) ; Launch success-story capture template
    Jun 2026 : Stakeholder channel maps by tier ; Shared asset kit v1 (slides, one-pagers, FAQs) ; Begin 2–3 pilot stories (proof-point based)
    Jul 2026 : Review + refine evidence gating ; Publish internal comms playbook v1 ; Prepare external-facing comms plan options (phased)
```

Why these deliverables first: they directly support Cap Business’s stated sustainable tourism/blue economy priorities and the IOC’s call for regional public–private dialogue by providing the minimum viable “shared language + shared process” needed to coordinate six territories. [50]
